Subject: agenda for the call today at 4 pm

Good morning! Today's call is to make sure that EPA and DEQ are on the same page going forward to the release of the draft conceptual remedy on September 18. This includes going over at tomorrow's full teams meeting: the probable alternative to be released; how the key technical issues will be addressed in the narrative about the remedy (including how the question of modeling and/or additional sampling and their relationship to natural recovery will be handled, what the residual risk situation looks like and why, what factors and assumptions are the primary cost drivers, etc.); and how the dialogue that will begin over the remedy and next steps in the process will be initiated and conducted. Based on this conversation, we will also today map out the agenda for the Thursday Dennis/Dick/Jim call; the final agenda for that call will be done after tomorrow's meetings. The agenda for today's call follows:

1. Affirm purpose and agenda for tomorrow's full teams meeting (Debbie has a draft agenda out for review)
2. Affirm purpose and agenda for tomorrow's managers' only meeting
3. Develop draft agenda for Thursday's Dennis/Dick/Jim call
4. Share any feedback not already covered from Headquarters, Congressionals, Governor's office, LWG, governmental partners, press, etc. regarding chapter 4, upcoming draft conceptual remedy, residual risk, cost estimates, additional sampling data, etc.
5. Discuss plans for outreach and communication after the release of the draft conceptual remedy
6. Other issues as appropriate.

Let us all know if you have any questions, comments, additions, etc. Otherwise, talk at 4 today.

Thanks!
